

TILCOR
roofmakers to the world

Tudor

The Tilcor Tudor textured-finish tile exudes a traditional, European style reminiscent of the Tudors of a by-gone age. Its elegant and undulating form is well suited to both modern and traditional homes.

Shake

The Tilcor Shake textured-finish tile features the wood-grain appearance of traditional shake. Its deep-ribbed profile is designed to enhance the shadow lines and create visual contrast.

Royal

The Tilcor Royal tile features a textured finish in a shingle-type design. Unique in its form, this smart tile will add interesting dimensions and shadow lines to your roof.

Two words best describes
Tilcor roofing system:

**Quality &
Durability**

Classic

The Tilcor Classic textured-finish tile features a defined angular profile that makes it one of the most popular products in the Tilcor range. Its sharp, clean lines and sloping edges create added depth and enhance the dimensions of your roofline.

Bond

The Tilcor Bond textured-finish tile captures the refined look of a traditional-style roofing tile while incorporating the lightweight advantages of steel. Its distinctive scalloped profile complements any architectural style.

Why are Tilcor stone coated steel roofing tiles the preferred option?

Proven Track Record

The Tilcor brand is a world leader in roofing products with experience in manufacturing since 1942.

Global brand with an international presence

Tilcor & its parent company have installed over 50 million square metres of roofing world-wide; equivalent to approximately 20% of the total size of Nigeria. With roofing tiles now installed in over 100 countries, the brand has become recognised as a world leader in roofing products.

New Zealand based world-class manufacturing capability

Tilcor roofing tiles are 100% manufactured at their New Zealand factory which complies with international quality standards & is ISO 9001-accredited.

Guaranteed quality & longevity

Tilcor roofing systems are backed by a 50 Year Weather-proof Warranty & 15 Year Surface Coating Warranty.

Exceptional strength & superior performance

Tilcor roof tiles are water, fire and earthquake resistant & can withstand the harshest climates including extreme heat, heavy rainfall & hurricane-force winds.

Double protection from rust and corrosion

Tilcor roofing systems are made from ZINCALUME steel - a special kind of steel coated with zinc & aluminium alloy - which is four times more resistant to corrosion than galvanised steel used in normal roofs. The combination of steel & stone coating provides double protection from rust & corrosion.

Colour does not fade

The stone granules used on Tilcor roofing tiles do not fade as they are made from natural stone sourced from quarries of New Zealand.

Sound proof from rain

The natural stone-coating of the roof tiles and empty space between the steel roofing panel and the underlayment minimizes exterior noise even in rain storm.

Environmentally friendly

Tilcor is committed to being an environmentally responsible manufacturer. All Tilcor products are produced from the world's most recycled material - steel. In addition, Tilcor roofing systems are energy efficient & suitable for rain water harvesting.
